

Purpose of Trip

1. Why US?

Ans: I intend to pursue my masters in Computer Science at Rowan University New jersey and I really got a nice oppurtunity.

2. Why only US?

Ans: Us is the leading country and centre of excellence in the field of computer science and Artificial Intelligence as I am more intrigued with both the fields and us universities are primarily research oriented. Its a great opportunity to explore the subjects and its a dream come true for me to hold a masters degree from us university.

3. Why did you select US for higher studies? Isn't this course offered by any university or colleges in India?

Ans: Education system in us is more practical with advance technology comparatively than in India

5. In what way the US education will enhance your career prospectus?

Ans:

- US degree has greater acceptance and credibility and also enjoys great popularity in India when I come back after my graduation. I would have a great and bright future with a US masters degree

6. Why are you going to this particular place in US ?

Ans:

When I thought about it, I've taken in consideration the right program and the right university and also the budget. Since the university I have opted to study has satisfied all these requirements. I am going ahead with it.

7. Where are you going to stay in US ?

Ans: I prefer to stay on campus

Points to remember for Purpose of Trip:

- US would be the apt destination for my program
- The US degree has more respect, credibility & acceptability
- US is the technology leader in the world
- In US universities the course have greater flexibility
- The practical knowledge that is acquired in US is of great help way back in India.
- US has one of the best education systems in the world

- The qualitative training provided will prepare the student to start working in the industry directly
- The US universities have a strong grounding in research

Question Related to University, Course, Specialization

1.Which University you are going for?

Ans: I am going to Rowan University in New Jersey

2. Why Rowan?

Ans: I was looking forward for thesis based masters in the field of CS, and i got an admission from rowan in the same field. Also rowan has the best laboratories with advanced technology in computer science. This was what i was exactly looking for. With everything in place i put rowan as my priority

Explain about the course?

This is a 30credit program and 4 core requirement like design and analysis of algorithms and advance data structures and algorithms and remaining 8 subjects will be of my specialization which are Machine learning,deep learning, computervision, NLP

What have you done in your undergraduate?

I have done my undergraduate in Computer science and engineering from Lovely professional University

Why Masters Now?

A master's course in this research centric environment we definitely prepare the students for challenging career

Why low GPA?

I believe that just good grades aren't enough to achieve goals. So i started working on different projects and learning new courses in the market. I have also worked on few live projects on ML,DL,CV explain your projects and show the certifications

Why your parents are spending all of their savings on you?

I am an only son to my parents and there very much happy to see me pursue my goals and achieve more. Its dream come true to both me and my family

Why have you taken loan?

I want to take some responsibility and be supportive to my family

Hence i have opted for loan so that i would be able to repay it once i finish my studies and start earning

Work Experience

1.Explain about your role?

Ans: My daily tasks include visualization of data and processing of massive amounts of data and performing queries about data

- My daily tasks include perform queries on assigned databases and need to fetch data and store it in cloud
- And should perform exploratory data analysis on that data and visualize the data by plotting the data if need should perform feature engineering techniques
- Clean the data if there are any null values or any outliers and end of the week I need to to submit a report on the work I have done

2.Explain the softwares you used?

Ans:

- Jupyter notebook
- Visual studio code
- Amazon webservices
- Python for programming

Funding

1.Who is sponsoring you / who is funding you?

Ans:

2.Wht does your mother do?

Ans:

3.Explain about your mother role?

Ans: ess

4.Her Annual Income?

Ans:

5. What will be the total expenses for your course?

Ans: 34,175 per year

68,350 per two years

Tuition fee - 16,400 per year

32,800 for two years

Living expenses - 13,500 per year

27,000 for two years

Health Insurance - 4,275 per year

8,550 for two years

6. Who will repay the Education Loan? Do you have to repay money to your parents also?

Ans: I'll repay my education loan and I don't need to pay back to my parents they are financially strong and don't need funds from me.

7. Why should I give you visa?

Ans: I am fulfilling all the visa requirements and shown the sufficient funds to meet all the expenses of my higher education and I have shown strong intent to go study and complete my masters and I have certain goals in my life and to pursue masters program is one of them for my better future and career prospects and I will be coming back to India as soon as I complete my masters So I am confident of getting visa

8. What will you do if I reject your visa?

Ans: I have given strong answers in favour of my student visa and studying in USA has been my dream I will analyse what might have gone wrong and where I failed in my efforts to convince you try to improve on those things and will apply again.

9. Why haven't you applied for universities mentioned to your score report ?

Ans: At the time of taking my test, I have not seriously thought of the universities. Once I get to know my scores, I started a search

10. In what way the course you are going to do in U.S. will help you?

Ans: The course equips with advanced technical skills related to my field. This widens my opportunities in Indian job market

11. Why your GRE score is low?

Ans: With respect to the low GRE score, the main reason was not managing the time properly, which has left me with a very small amount of time to tackle the remaining questions. This was the reason why I score low in GRE

12.If the GRE score was low, why you didn't give the next attempt?

Ans: The reason for not giving the next attempt was that almost all the highly ranked US public universities look for a holistic profile of a student and not just GRE scores. I believe in my case my experience and the research which I have done in the field of AI has improved my profile and offset the low GRE score

13.How did they gave you non collateral loan?

Ans: I am a credible student and I have reached admission criteria and also by my GRE and IELTS scores they have approved a loan

14.What is artificial Intelligence?

Ans: Artificial Intelligence is the simulation of human intelligence which process by machines especially computer systems

15.What is Machine Learning?

Ans: A subfield of AI that gives the computers ability to learn without being explicitly programmed

16.What is deep learning?

Ans: Deep learning is the subfield of machine learning which mimics the human brain like structure called artificial neural networks that permits to train itself

17.What is Natural Language processing?

Ans: Is the subset of AI which gives the ability to computers to intercat with humans and analyze large amount of natural language data.

18.What is computer vision?

Ans: The goal of computer vision is to make useful decisions about real physical objects based on images.

19.What is datascience?

Ans: Data science is the field which uses methods and algorithms to extract insights from structured and un-structured data.

20.What is computer science?

Ans: A study of algorithmic processes

21.What is engineering?

Ans: Engineering is the use of scientific principles to design and build machines

Ties to INDIA

1.What after post masters?

Ans: My goal is to become data scientist when I come back to India I can get easily into top MNC'S like Microsoft, Amazon,IBM as a data scientist and masters degree from us gives more weightage to my resume.
